Advanced CSS3 Showcase

Created by Anthony Hadin

1. Rounded Corners, Gradients and Shadows

This webpage uses border-radius to create rounded corners, linear-gradient for colourful backgrounds, and box-shadow to add depth to elements.

2. Border Image

CSS Border Image Demonstration

The border-image property uses a gradient as the border instead of a normal solid border.

3. Multiple Backgrounds

Multiple Background Layers

Two background layers are combined using background-image. Background-size controls their dimensions.

4. Input Pseudo-Classes

Name (required):

Enter your name

Email (required):

example@email.com

Submit Reset

Click an input to see :focus, :required and :valid styles.

5. Image Opacity on Hover

Hover over Item 1

Item 1

The image becomes clearer when you hover over its label.

6. Table with Alternate Row Colours

CSS Property	Purpose	Example
border-radius	Rounds element corners	15px
border-image	Creates decorative borders	Gradient border
background-size	Controls background dimensions	cover
box-shadow	Adds shadows around elements	0 2px 8px gray
