HTML5 AND CSS3 SHOWCASE

Anthony Hadin

Web Development Practical Experiment

Normal Flow Layout

Hello! I am Anthony Hadin, a Computer Science student specializing in AI and Machine Learning. HTML5 creates webpage structure, while CSS3 styles elements using margins, padding, fonts, colours, and layouts.

HTML5

HTML5 creates webpages using headings, paragraphs, images, links, lists, tables, and multimedia elements.

HTML5

CSS3 Properties

Text Formatting

Font Style and Weight

Text Shadow Effect

Background and Padding

My Skills

- HTML and CSS
- Python Programming
- AI and Machine Learning
- Web Development

Learn CSS

Display, Height and Width

Block Element: 50% Width, 45px Height

Example of an inline element inside a paragraph.

Margin and Padding

Margin creates space outside an element; padding creates space inside it.

CSS Link States

Google GitHub MDN

Hover over a link to see its background colour change.
